PROFILE

My name is Muhammad Awais. After my second year of studies, I developed a keen interest in coding. I learned frontend development through YouTube tutorials and then completed an internship at Lighthouse Technologies where I focused on React JS. Subsequently, I moved to Lahore and joined Solutionwin Technologies to learn PHP and Laravel. I've been working here as a full-stack engineer for the past year.

WORK EXPERIENCE

Lighthouse Technologies   08-2023 to 10-2023
Front-end Developer

I worked at LighthouseTechnologies for 3 months where I learned React and built numerous website and dashboard frontends for them. I extensively used Bootstrap to create many websites.

Salaar interprices Lahore   11-2023 to 15-01-2024
Front-end Developer

I interviewed at Salar Enterprises and was selected. I developed a dashboard frontend for them as part of my role. However, I later decided to leave the company.

Solutionwin Technologies   16-01-2024 - till now
Full Stack Developer

At Solutionwin Technologies, I gained expertise in PHP, Laravel, and MySQL. I've been involved in multiple projects, handling tasks such as bug fixing, feature development, and automating data processes using Google Apps Script. This includes creating and importing data into Google Sheets.
